

VEDIC ASTROLOGY REPORT

Parashara · Jaimini · Nakshatra · Vimshottari Dasha Analysis

Name	Aarush Yadav
Gender	Male
Date of Birth	22 April 2003
Time of Birth	02:00 AM (Approximate)
Place of Birth	Gwalior, Madhya Pradesh, India
Current City	Ghaziabad, Uttar Pradesh, India
Profession	B.Tech Information Technology Student (Final Year)
Relationship Status	Single
Key Concerns	Career Placement · Financial Stability · Foreign Opportunities

1. Birth Chart Summary

Element	Value
Lagna (Ascendant)	Capricorn 20°24' — Nakshatra: Shravana, Pada 4
Moon Sign (Rashi)	Sagittarius 16°41' — Nakshatra: Purva Ashadha, Pada 2
Sun Sign	Aries 7°25' (near-exact exaltation degree)
Nakshatra (Moon)	Purva Ashadha — ruled by Venus

Planetary Placements (Whole Sign Houses from Capricorn Lagna)

Planet	Sign	House	Dignity
Saturn (Lagna lord)	Gemini	6th	Neutral
Jupiter	Cancer	7th	Exalted
Mars	Capricorn	1st	Exalted
Rahu	Taurus	5th	Strong
Ketu	Scorpio	11th	Neutral
Sun	Aries	4th	Exalted (near-exact)
Mercury	Aries	4th	Neutral (conjunct Sun)
Venus	Pisces	3rd	Exalted
Moon	Sagittarius	12th	In friendly sign

Major Yogas

- Ruchaka Yoga** (Mahapurusha Yoga) — Mars exalted in the 1st house (Lagna). Gives physical courage, competitive drive, and leadership capacity.

- **Hamsa Yoga** (Mahapurusha Yoga) — Jupiter exalted in the 7th house (a Kendra). Gives wisdom, ethical strength, and fortune tied to partnerships.
- **Budh-Aditya Yoga** — Sun-Mercury conjunction in the 4th house. Sharpens intellect, analytical ability, and communication — directly relevant to a tech career.

Having two Mahapurusha Yogas in one chart is a genuinely strong, fairly uncommon combination — a real structural strength, not just a flattering label.

Doshas

- **Mangal Dosha** — technically present (Mars in 1st house from Lagna, and 2nd from Moon). Classical texts hold that an exalted Mars significantly reduces or cancels the dosha's ill effects. Worth mentioning for marriage matching, but not a cause for concern.
- **No Kaal Sarp Dosha** — planets are not confined to one side of the Rahu-Ketu axis.

Functional Benefics & Malefics

Functional Benefics: Venus (Yogakaraka — rules 5th & 10th), Mars (rules 4th, Kendra lord, exalted), Moon (rules 7th), Saturn (Lagna lord)

Functional Malefics: Sun (rules 8th, though exalted so effects are softened), Jupiter (mixed — rules 3rd and 12th despite being exalted), Mercury (rules 6th, mixed with 9th lordship)

2. Life Pattern Analysis

Core Personality

Capricorn Lagna with exalted Mars in it gives a disciplined exterior but with real assertiveness and drive underneath — more ambitious and competitive than you may let on socially. Saturn as Lagna lord in the 6th house suggests someone who grows through effort, competition, and problem-solving rather than inherited ease.

Childhood & Family Influences

Sun (exalted) and Mercury conjunct in the 4th house (home, mother, early education) suggest a household where intellect and self-respect were emphasized, possibly with transformative shifts in domestic circumstances — moves, changes in family structure, or turning points around home/property during childhood.

Repeating Karmic Patterns

Moon (mind, emotions) sits in the 12th house — a recurring theme of introspection, restlessness, and a pull toward "elsewhere." This is one of the classic markers for people who end up living or working abroad, or who feel most themselves away from their birthplace.

Relationship Tendencies

Moon as 7th lord placed in the 12th house can mean emotional distance shows up early in relationships, or that partners/relationships connect to foreign settings. Jupiter (exalted) in the 7th house is a strong counterbalance — genuinely favorable for eventual marital happiness and a partner of good character.

Career Strengths & Blind Spots

Venus exalted as 10th lord in the 3rd house is a strong career signature — success through skill, self-effort, and communication, well suited to technical/creative fields. Blind spot: Saturn in 6th can create a tendency to overwork or take on more struggle than necessary before results show.

Financial Habits

Rahu in the 5th house (speculation, intelligence) can create attraction to unconventional income ideas — this needs discipline, since Rahu's instinct is fast, not steady.

3. Career & Wealth (Priority Analysis)

Career Suitability

Very strong for IT/tech. Exalted Venus (10th lord) in the 3rd house signals skill-based success; Budh-Aditya Yoga sharpens analytical strength; Mercury (6th/9th lord) ties directly to technology, service-sector jobs, and higher-education luck.

Job vs Business

The chart leans toward **job/service first, business potential later**. Saturn (Lagna lord) in the 6th house of service/employment is a strong "job success" signature, especially through your 20s. Entrepreneurial potential increases from the early-to-mid 30s onward, particularly once Mars Mahadasha begins (2034) — Mars rules the 11th house of gains and sits exalted in the Lagna, a strong self-made-success signal.

Leadership Potential

High. Ruchaka Yoga directly supports leadership and the ability to take charge under pressure — typically clearer from the early 30s onward.

Government Job Potential

Moderate, not the chart's strongest lean. Saturn in the 6th supports government/competitive-exam-based roles if chosen, but the stronger indicators (exalted Venus/Jupiter, Mercury) point toward private-sector tech, MNC, or specialist/technical roles over bureaucratic ones.

Foreign Opportunities

This is a genuinely strong theme in the chart — three separate indicators point the same direction: Jupiter (12th lord of foreign lands) exalted in a Kendra (Hamsa Yoga); Moon in the 12th house; and Rahu (foreign/unconventional significator) in the 5th house of education. This combination supports higher studies abroad or a career path involving foreign clients, foreign relocation, or international remote work.

Wealth Accumulation

Good long-term potential, not instant. Venus (Yogakaraka) exalted is the strongest wealth signature; growth is more "earned through skill" than inherited or windfall, aside from occasional Rahu-linked unconventional gains (5th house) which should be handled cautiously, not chased.

Investments & Property

Property indicators (4th house) are strong — exalted Sun plus Mercury there suggest real potential for property ownership, ideally financed methodically rather than speculatively (avoid heavy leverage during Rahu sub-periods specifically).

Timing of Key Phases

Phase	Age Range	Nature
Foundational struggle/effort	21-24 (now)	Job search, some volatility (Moon-Rahu)
Career acceleration	24-25	Strong growth (Moon-Jupiter)
Disciplined building phase	25-27	Slower but steady (Moon-Saturn)
Communication/tech breakout	27-28	Strong (Moon-Mercury)
Major elevation	31+	Mars Mahadasha begins — leadership, possible business/authority role

4. Relationships & Marriage

Love vs Arranged

The chart doesn't strongly favor one over the other — Venus (5th lord, romance) exalted supports a genuine love connection forming, but Jupiter's strength (7th house) also supports a well-matched, elder-approved union. A self-initiated relationship that later gains family blessing is plausible.

Marriage Timing Window

The most favorable window is **2027-2028** (Moon-Jupiter antardasha), when Jupiter — exalted in the 7th house — is active. A secondary window opens around **2030-2031** (Moon-Mercury). Before 2027, focus is more on career than settling into marriage.

Spouse Characteristics (Interpretive)

7th house is Cancer, with lord Moon in the 12th — suggesting a partner who may be emotionally deep, possibly connected to foreign residence/travel, or someone met through unconventional or distant circumstances rather than close social circles.

Strengths & Risks

Exalted Jupiter is a real strength — ethical, supportive partnership potential. Risk: Moon's 12th house placement can create emotional distance or communication gaps if not consciously worked on; this is a pattern to watch, not a fixed outcome.

5. Current Dasha Analysis

Period	Duration
Current Mahadasha	Moon (13 April 2024 - 13 April 2034)
Current Antardasha	Rahu (12 September 2025 - 14 March 2027)

What This Means Right Now

Moon (7th lord, functional benefic) placed in the 12th house, running through Rahu (in the 5th house), creates a period defined by restlessness paired with real opportunity — especially unconventional or foreign-linked ones. This is a very plausible period for a placement offer, an internship-to-job pivot, or an unusual/off-the-beaten-path opportunity (including abroad-linked roles) to appear — but Rahu periods also bring some anxiety and impatience, so avoid rushing major decisions (job offers, financial commitments) without real due diligence.

Current Transits Reinforcing This

Transiting Jupiter is currently in Cancer (the 7th house) — its own exaltation sign — supporting partnerships and opportunities right now. Transiting Saturn in Pisces (the 3rd house) favors disciplined effort and skill-building, fitting well with active job-hunting and upskilling.

6. 5-Year Forecast

Year	Career	Money	Relationships	Health
2026	Job search intensifies; possible unconventional/foreign-linked offer by year-end (Moon-Rahu)	Modest; avoid speculative moves	Singlehood likely continues; avoid impulsive decisions	Mild stress/anxiety; prioritize sleep
2027	Strong upswing from March (Moon-Jupiter begins); recognition or higher-studies opening	Steady growth	Favorable window opens for a serious relationship	Improved, more optimistic
2028	Best year — promotion, abroad move, or major milestone likely	Good growth, can start real savings/investing	Marriage discussions plausible if in a relationship	Generally good
2029	Slower, more effortful (Moon-Saturn); building long-term foundation	Steady, budget carefully, avoid big risk	Some testing/patience required in relationships	Watch fatigue, joint/bone health
2030	Transitions to communication/tech-driven growth from February	Improving	Mercury phase favors deeper bonding, possible marriage steps	Better mental clarity

Best year: 2028 — full year of Moon-Jupiter, the most auspicious sub-period.
Toughest year: 2029 — Moon-Saturn demands patience; real progress, but earned slowly.
Major turning points: March 2027 (Moon-Jupiter begins), and further out, 2034 (Mars Mahadasha) — a likely period of significant authority/leadership elevation.

7. Remedies

Given the chart is genuinely strong (two Mahapurusha Yogas, three exalted planets), this is a case for refinement, not damage control — aggressive remedial measures are not required.

- **Mantra:** Chanting the Aditya Hridaya Stotra or a simple Surya mantra on Sundays can support the exalted-but-8th-lord Sun, easing transformation-related stress around home/career changes.
- **For the Moon-Rahu period specifically:** Chandra mantra ("Om Som Somaya Namah") on Mondays can help steady the mind during this more restless sub-period.
- **Donation:** Donating white/light-colored food items or clothing on Mondays supports the Moon; donating to educational causes supports Jupiter, which is already a strength worth reinforcing.
- **Gemstone:** Caution advised — with Venus and Jupiter both already exalted, wearing amplifying gemstones (emerald, yellow sapphire) isn't strongly indicated and is not recommended without a proper in-person consultation and muhurta. This chart mainly needs patience and consistent effort through the Moon-Saturn phase, not stone-based amplification.

This report is based on sidereal (Lahiri ayanamsa) calculations from the birth details provided, with birth time marked as approximate. Predictive astrology should be treated as a symbolic and interpretive framework offering probable tendencies and supportive seasons — not guaranteed outcomes. Practical effort, timing of applications, and personal decisions remain the primary drivers of real-world results.
